ABSTRACT:

PROBLEM TO BE SOLVED: To simply remove dust hard to remove by a brush, a bloom, a duster, a vacuum cleaner or the like by mounting an adhesive tape, film or sheet coated or impregnated with an adhesive agent on a rotary roller or a moving belt with an adhesive surface thereof outside.

SOLUTION: An adhesive tape or film 3 is attached to a rotary roller 1 to make it a cleaner, an adhesive sheet is attached to a moving belt to make it a cleaner, or an adhesive tape or film slit is attached to the rotary roller.

The adhesive tape, film or sheet is rolled or moved on clothing, bedding, a sofa, a cushion, a carpet, tatami or the like to clean them up. This enables simply removal of dust in the clothing, the bedding, the sofa, the cushion, the carpet, the tatami or the like free from the adhesion of the adhesive agent without sliding the surface of the clothing, the bedding, the sofa, the cushion

or the like together therewith.
